FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Ms. Marlene H Dortch Secretary Federal Communications Commission 445-12th Street SW Washington, DC 20554

RE: Richardson Certification Filing for the

WHAT-COMM Communications Center 9-1-1 in Washington

WT Docket No. 03-76

Dear Ms. Dortch:

Pursuant to the City of Richardson Reconsideration Order,' enclosed is T-Mobile USA, Inc.'s certification with respect to the E911 request it has received from the WHAT-COMM Communications Center 9-1-1 in Washington.

Please contact me at 202-054-5900 with any questions or concerns

Sincerely.

Robert A. Calaff

Sciiior Corporate Counsel

Governmental and Industry Affairs

Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, CC Docket No. 94-102, Order on Reconsideration, rel. Nov. 26, 2002 (City of Richardson Reconsideration Order).

CERTIFICATION OF TIM WONG

- I, Tim Wong, certify:
- 1. This certification is made on behalf of T-Mobile USA, Inc. ("T-Mobile") under Section 20.18(j)(4) of the Commission's rules, 47 C.F.R. § 20.18(j)(4).
- 2. I am Chief Technology Officer of T-Mobile. As Chief Technology Officer, I am responsible for and have general knowledge of T-Mobile's deployment of E-911 service. To the extent this certification discusses E911 deployment on the Public Safety Answer Point's ("PSAP") side of the demarcation point, those portions of this certification are based on T-Mobile's best understanding of those facts and circumstances, which is based largely on the representations of the PSAP and/or its Local Exchange Carrier ("LEC").
- 3. WHAT-COMM Communications Center 9-1-1, in Washington State, requested Phase I E911 service on 5/14/2002. More than six months have elapsed since the date of receipt of this request, and the deployment has not been completed.
- 4. To the best of niy knowledge, the PSAP known as WHAT-COMM Communications Center 9-1-1 is currently not able to receive and utilize Phase I E911 data elements. I describe below the basis for this determination and reasons why further implementation efforts cannot be made until the PSAP becomes capable of receiving and utilizing the data elements associated with the E911 service requested.
 - (i) T-Mobile is implementing WHAT-COMM Communications Center 9-1-1's request for Phase I E911 service using non-call associated signaling (NCAS) and an E2 interface. WHAT-COMM Communications Center 9-1-1's ALI datahasc which is on the PSAP's side of the demarcation point is currently not able to receive and utilize Phase I data elements transmitted using NCAS and an E2 interface.
 - (ii) Qwest is the 911 System Service Provider (SSP) for WHAT-COMM Communications Center 9-1-1 and provides the **ALI** database to the PSAP. Although Qwest has the technical capability to do so, and has now agreed to implement a change to its ALI database, it has not yet upgraded the ALI database interface in this manner so that WHAT-COMM Communications Center 9-1-1 would be capable of receiving Phase I E911 service using the E2 interface.
 - (iii) Until Qwest upgrades the ALI database, T-Mobile cannot complete Mobile Switching Center and Gateway Mobile Location Center data translations hecause, as a practical matter, these translations must be completed close in time to final deployment to avoid repeating the translations due to underlying network changes, or test the requested service, and WHAT-COMM Communications Center 9-1-1 will not be able lo receive and utilize the E911 data elements transmitted by T-Mobile.
- 5. Listed in Attachment "A," attached hereto, are the specific steps T-Mobile has taken to provide the requested service to WHAT-COMM Communications Center 9-1-1, and the

specific steps that remain to be completed by T-Mobile. "Yes" means T-Mobile has conipleted that step. "Incapable" means T-Mobile cannot complete that step until the PSAP or LEC completes certain prerequisite steps, as described above. "N/A" means that the specific step in not applicable to the requested service in this instance (*i.e.*, it is a Phase I request and the specific step listed is Phase II only).

- 6. Listed in Attachment "B," attached hereto, are the specific steps that remain to be completed by the PSAP or other parties before T-Mobile can provide the E911 service requested. "Yes" means that, Io the best of T-Mobile's understanding, the PSAP has completed that step. "No" means that, to the best of T-Mobile's understanding, the PSAP or other responsible party, has not completed that step. "N/A" means that the step is not applicable to the requested service in this instance. "Unknown" means that T-Mobile does not have sufficient knowledge to make any determination regarding the status of that step.
- 7. In accordance with Section 20.18(j)(4)(i) of the Commission's rules, on March 3,2003, T-Mobile provided, by overnight, express delivery, written notice to WHAT-COMM Communications Center 9-1-1 of T-Mobile's intent to file this certification. WHAT-COMM Communications Center 9-1-1 did not respond to that notice.

I certify under penalty of perjury that the foregoing is true and correct.

Executed on March 2(1, 2003, by:

Tim Wong

Chief Technology Officer

ATTACHMENT A to Certification of Tim Wong Steps taken hy T-Mobile toward E911 Implementation for WHAT-COMM Communications Center 9-1-1

Yes Incapable N/A	Built, tested, and integrated the Gateway Mobile Location Center ("GMLC") into T-Mobile's network
Yes Incapable N/A	Built, tested, and integrated the Serving Mobile Location Center ("SMLC") into T-Mobile's network (Phase II only)
Yes Incapable N/A	Built, tested, and integrated Location Measurement Unit(s) ("LMU") (Phase II, EOTD only)
Yes Incapable N/A	Upgraded, lested, and patched software in Mobile Switching Center(s) ("MSC")
YesincapableN/A	Upgraded, tested, and patched software in Base Station Controller(s)
Yes Incapable N/A	Requested selective router location (CLLI codes) from the PSAP or obtained location from an alternate source
Yes nlncapable N/A	Sent coverage map(s) to the PSAP
Yes Incapable N/A	Sent data file(s) to the PSAP
Yes Incapable N/A	Requested routing instructions from the PSAP
Yes nlncapable N/A	Prepared network design diagram
Yes nlncapable N/A	Perfomied trunk sizing (i.e., determined the number of trunks required)
Yes Incapable N/A	Completed forms and exhibits for ordering trunks from LEC
Yes Incapable N/A	Obtained PSAP authorization 10 order trunks, if applicable
Yes Incapable N/A	Ordered trunk(s) from LEC

ATTACHMENT A

ATTACHMENT A to Certification of Tim Wong Steps taken by T-Mobile toward E911 Implementation for WHAT-COMM Communications Center 9-1-1

Yes Incapable N/A	Ordered transport from LEC, if applicable
Yes Incapable N/A	Tested trunks
Yes Incapable N/A	Requested pANI assignment from LEC or obtained from an alternate source
Yes Incapable N/A	Completed data file for delivery to PSAP
Yes Incapable N/A	Sent data file to PSAP
Yes Incapable N/A	Completed date tile for delivery to ALI database provider
Yes Incapable N/A	Sent data file to ALI database provider
Yes Incapable N/A	Perfonned MSC data translation (script allowing routing of E911 voice to correct PSAP and identification of the receiving tower)
Yes Incapable N/A	Performed GMLC data translation (script allowing routing of E911 data to correct PSAP and identification of the receiving tower)
Yes Incapable N/A	Scheduled testing with PSAP
Yes Incapable N/A	Performed profile test
Yes Incapable N/A	Performed field test
Yes Incapable N/A	Reconciled field test
Yes Incapable N/A	Perfonned retest, if applicable
Yes Incapable N/A	Accepted testing (provisioning complete)

ATTACHMENT A

Page 2 of 2

ATTACHMENT B to Certification of Tim Wong Actions Required By WHAT-COMM Communications Center 9-1-1 Or Other Parties Before T-Mohile Can Complete E911 Implementation

Yes No N/A Unknown	Requiested service from LEC (PSAP)
Yes No N/A Unknown	Sent selective router location (CLLI codes) to T-Mobile (PSAP)
Yes No N/A Unknown	Sent routing instructions to T-Mobile (PSAP)
Yes No N/A Unknown	Upgraded Customer Premises Equipment ("CPE") (including Computer Aided Dispatch ("CAD"), Geographic Information System ("GIS"), and 10-digit capability) (PSAP)
Yes No N/A Unknown	Built Master Street Address Guide ("MSAG") (PSAP)
Yes No No Unknown	Completed data file upload (LEC)
Yes No N/A Unknown	Upgraded ALI database, if applicable (LEC)
Yes No N/A Unknown	Upgraded selective router, if applicable (LEC)
Yes No N/A Unknown	Provisioned trunks for T-Mobile (LEC)
Yes No N/A Unknown	Provisioned or upgraded trunks for PSAP (from Phase zero io Phase I or II), if applicable (LEC)
